Drive
the
difference.

+STROMER-

New mobility for more joy of riding, efficiency and quality of life.

Dear Reader,

The mobility transformation continues to gather pace. People are becoming increasingly aware not only of limited resources and climate change, but also of personal health and balanced lifestyles. Stromer has been a part of this transformation over the past 10 years bringing new innovation to mobility.

Our strategy is simple, we build the best Speed Pedelecs. Stromer has engineered an experience that will have you looking forward to your daily commute, gladly forgoing your car, even for longer trips. Savor that unique sense of freedom you get as you zoom past congested vehicles.

Take a test ride on a Stromer at one of our dealers and discover the difference. Leave your car parked in the garage and accelerate your own personal mobility transformation. We look forward to welcoming you into our community.

Kind regards,
Jakob Luksch,
CEO myStromer AG

The nimble e-bike for every day.

A Stromer is made for people who have much to accomplish and who also enjoy being on the go themselves. Instead of spending precious time in traffic, they take advantage of their daily commutes by using them as a workout, for stress reduction and the joy of riding – bringing more quality of life all round. More than 80,000 bike enthusiasts worldwide have already caught the Stromer bug and between them clock up over 4.4 million miles per month*. Proof enough for us – Stromer is the perfect commuter bike!

“Just a short test ride is enough – and you’re hooked”

* Average figure for May – August 2020 for all Stromer bikes with OMNI connectivity.

reddot winner 2020

DESIGN &
INNOVATION
AWARD2020

PLATINUM

- In an exhilarating 2.9 seconds from 0 to 28 mph
- Ideal for daily commutes up to 22 miles or even more (range up to 110 miles)
- Arrive without breaking into a sweat – even for the less athletic
- Enjoyable whatever your riding style, whether laid-back or sporty
- Better performance at your job
- More relaxation after clocking out

Swiss standards of efficiency and quality.

The Swiss company stands for contemporary mobility with inspiring dynamics and design. With renowned Swiss innovation and engineering, we are always striving for the greatest precision, quality, high value and efficiency.

Perfect for people and the environment.

If more people regularly ride Stromer bikes and leave the car in the garage, the better it will be for us all in the end. Riding a Stromer is better for your own personal health and the health of the environment.

Drive the difference.

What makes a ride on a Stromer so special? We think the difference comes down to its unique blend of quality, efficiency and rideability. Something we have achieved by bringing together our entire expertise – from design and assembly to sales – in one place at our Stromer campus in the Swiss town of Oberwangen, near Bern.

We are convinced that big achievements are made up of many bright ideas. And that true character is defined by high-performance components that perfectly match your requirements. Try a Stromer – we know you'll love it!

about Stromer
technology.

Uncompromising design

Stromer design shapes your riding experience for comfort and fun. Our multiple award winning design integrates aesthetics and technology to perfection: simple cockpit with accessible on-board computer in the top tube, sporty, striking frame silhouette, internal cable routing and integrated battery, and virtually invisible motor in the rear axle.

Technology that has won several awards

Integrated, clean design; clear, distinctive brand identity

Connectivity

Connected while on the go with Stromer OMNI connect. Select the handling characteristics and motor output according to your individual requirements and use smart functions such as over-the-air updates, automatic locking, keyless battery eject and triple anti-theft protection with GPS localization. The user-friendly app and on-board computer make the daily commute even more convenient – and you and your bike inseparable. More on p. 34.

3G | Bluetooth

Smartlock and over-the-air updates

Range

Four high-quality, extremely long-lasting batteries. Also, a regenerative brake maximizes the range. The result is plenty of energy to take you a distance of up to 110 miles on a daily basis. Depending on what pedal assist level you choose – and how far you want to go in that mode. The batteries are compatible with all current models and can be charged quickly at every socket – after removal at the press of a button or directly on the bike.

Long-life batteries

Range up to 110 miles

Recuperation

For extra range

Power

Most efficient drive for Speed Pedelecs. The legendary rear-wheel motor of the Stromer lets you ride quietly, dynamically and efficiently at speeds of up to 28 mph. And it delivers its power to the precise point where it is needed – straight to the hub. That gives it many advantages over a mid-mounted motor: less wear on the drive and brake, in return for more propulsion, more dynamism, more safety, more range, more elegance – and above all, more riding fun.

Powerful motor assistance

Up to 28 mph and 650 W | 48 Nm

Rear-wheel drive

Dynamic, powerful, quiet and efficient

Low maintenance effort

Low stress on the drive

The executive among the Speed Pedelecs.

The unsurpassed flagship with maximum power and range, fully integrated design and exclusive high-end components for the greatest performance and excellent riding dynamics.

—STS—
Driven by Perfection

“In addition to pedestrians, the e-bike also impresses its riders with a confidence that brings tears to their eyes. Although the tears of joy blend together with those caused by the strong wind you create.”

Customizable

Smart connectivity – with Stromer OMNI connect.

Our current Stromer models are fitted with mature digital technologies. These give you seamless connectivity with your Stromer (see summary on right).

The following functions of the cloud-based platform Stromer OMNI connect are available to you via the Stromer OMNI app:

Triple anti-theft protection – your Stromer has triple protection in locked mode:

- Electronic motor locking:** Your Stromer cannot be ridden without unlocking it via the app or entering the PIN on the display.
- Warning message thanks to 3G technology:** As soon as your Stromer is moved while in locked mode, you receive a text message or an email. The bike's flashers and horn are activated.
- GPS localization:** You can locate your Stromer at any time via GPS.

Smartlock – automatic locking and unlocking of the bike via Bluetooth.

Keyless – keyless battery ejection at the press of a button.

Individual motor settings – you can use OMNI to adjust the behavior of your motor, for example to select a support mode or regulate the pedal and brake sensors.

Remote Services and Updates – information about your Stromer's current status, such as battery charge level, battery temperature and motor temperature, is available whenever you want it – including for your specialist dealer, to allow remote maintenance. Software updates are performed conveniently over the air.

Statistics – OMNI presents you with all the performance data, such as the mileage (total, current trip, current month, past year, etc.), the performance history (over the week, month, year) or the number of days ridden.

○ reduced availability

* As a new feature for the ST1, we offer a factory upgrade option to OMNI Interface C for complete connectivity.

>> Upgrade options p. 42

The Stromer OMNI app – The specially developed app can also function as your digital vehicle key. As you approach your Stromer, it is unlocked automatically. As you move away from it again, the clever, integrated anti-theft protection is activated immediately. The result is carefree mobility all the time, as you always know your Stromer's location and status (except ST1).

And all data for your Stromer is permanently ready to hand. View your vehicle statistics, configure your Stromer's handling characteristics, tune your vehicle to your personal preferences or check up on the service entries made by your specialist dealers.

The myStromer app is available for iOS (version 7.0 or higher) and Android (version 4.1 or higher) smartphones.

ST2 with comfort frame in Royal Blue with suspension fork and suspension seatpost.

Perfect for you – the Stromer online configurator.

Why not configure your ideal model yourself? The Stromer online configurator neatly displays the factory-fitted selectable options available, such as paint finish, frame or equipment version.

If you aren't yet sure which model is right for you, the Stromer BikeFinder will also help you decide. Simply answer a few questions about your mobility requirements to find your perfect Stromer in three easy steps.

Arrange to take a test ride and discover the difference. If you already know what you want, configure your preferred model at your nearest Stromer dealer with home delivery service.

Scan and
configure.
