

+STROMER-

#HereToChange

Longing for Monday mornings.

#HereToChange

Our mobility requires change, and we can all do our part. Trade in traffic or the stress of public transport for a healthier mode of travel and fresh morning air. Look forward to your commute every day. Experience the indescribable feeling of freedom and autonomy on two wheels. Enjoy every curve and every moment. At Stromer our daily task is promoting and advancing mobility while offering you an incomparable riding experience.

We are **#HereToChange**.

The nimble e-bike for every day.

With a talent for innovation and engineering, we strive for the highest precision and quality. We develop Speed Pedelecs (e-bikes up to 45 km/h) for people who want to get things done and who also enjoy being on the go themselves.

High CO₂ emissions and stress in commuter traffic? Not with a Stromer. In 2023 over 127,000 people around the world rode more than 109 million kilometers on a Stromer. Compared to car drivers, they thereby saved 20,819 tons of CO₂.

Join the Stromer community and experience pure riding joy!

- Incomparable drive – powerful, silent and dynamic
- In an exhilarating 2.9 seconds from 0 to 45 km/h
- Ideal for daily commutes up to 35 km or even more (range up to 260 km)
- Travel efficiently, without breaking a sweat – even for less athletic riders
- Uncompromising, comprehensive safety concept – from visibility and components to connectivity
- Better performance at your job
- More relaxation after clocking out

«My Stromer makes me feel free like nothing else, a feeling I never want to lose again»

Stromer Video
#HereToChange

What makes a Stromer so special.

#Design

We give shape to riding fun. Invisible cable routing, barely visible motor, fully integrated battery and on-board computer: The award winning, integrated design perfectly combines aesthetics with technology.

#Connectivity

Over-the-air updates, free app, triple anti-theft protection with GPS localization, Smartlock, crash detection, individual motor settings and much more: Thanks to the full connectivity via Stromer OMNI connect, you have the best connection to your Stromer.

#Range

Stromer batteries have true endurance: Our strongest battery can make it up to 260 km, or even further thanks to recuperation of the braking energy (regenerative braking).

#Safety

Strong brake system — optionally with ABS — and daytime running light, tires with the highest grip, best balance: Your safety is guaranteed by top-quality technologies and components.

#Power

Our powerful rear-wheel motors with up to 940 W | 52 Nm help to silently and dynamically accelerate up to 45 km/h. And the best thing? They act directly on the hub. This means less wear, and instead more thrust, safety and riding fun.

Learn more about
Stromer technology.

More riding pleasure, safely.

Our Speed Pedelecs are specially designed for riding on the road and in urban traffic – terrain on which optimal balance, braking power, grip and good vision/visibility are vital. For this reason, all Stromers have:

- Powerful brakes (some with ABS)
- Daytime running light and super-bright LED headlights
- Special frame geometry with a low center of gravity for ideal roadholding
- Tires developed specifically for us (by Pirelli, among others) for maximum traction and grip
- «Crash Alert»: Crash detection and an automatic text message to an emergency contact (only available in Europe)
- Connectivity to the Stromer Smart Helmet with additional brake light

Fully integrated anti-lock braking system.

We introduced the world's first Speed Pedelec with a fully integrated ABS from Blubrake onto the market in 2022 with the ST5. The new ST7, ST5 and (as an option) the ST3 Pinion are also equipped with this electronically controlled brake technology. It ensures that the front wheel does not lock up and the e-bike does not flip, even if the brakes are fully applied. The powerful 4-piston brake from TRP is perfectly tuned to the bike. This means that you are safely on the go even with challenging road conditions and traffic situations.

Our ABS was tested and graded as good by the Swiss Council for Accident Prevention (BFU).

Smart connectivity – with Stromer OMNI connect.

The cloud-based platform OMNI connect seamlessly connects you to your e-bike – via the Stromer display and free **Stromer OMNI app**. This allows you to easily configure and locate your Stromer as well as call up vital data. The Stromer OMNI functions include:

Triple anti-theft protection when locked:

1. Electronic motor locking: Your Stromer cannot be ridden without unlocking it via the app or by entering the PIN on the display.
2. Warning message: As soon as your Stromer is moved while in locked mode, you receive a text message or an email and the bike's flashers and horn are activated.
3. GPS localization

Smartlock: Automatic locking and unlocking via Bluetooth.

Keyless: Keyless battery ejection at the push of a button.

Individual motor settings: Adapt the behavior of the motor, e.g. select assistance mode, regulate pedal and brake sensor.

Remote services and updates: Service booklet (incl. service reminder), calling up information on the state of the Stromer (e.g. battery charge level, battery temperature, motor temperature) – also via remote maintenance by your specialist dealer; software updates over-the-air.

Statistics: Calling up performance data, e.g. mileage, average speed or active days.

Crash Alert: Crash detection and an automatic text message to an emergency contact (only available in Europe).

The models **ST2, ST3, ST5** and **ST7** have **full connectivity** via cellular network and Bluetooth thanks to the free integrated SIM card – meaning that **all functions** are enabled.

The model **ST1** has **basic connectivity** via Bluetooth. The SIM card can be enabled as an option, and with it **full connectivity** with all functions.

More on Stromer
OMNI connect.

Empowering Game Changers.

As the official e-bike partner of Alinghi Red Bull Racing, we support the Swiss sailing team with our Speed Pedelecs.

This year we are dedicating two special models to the team's long-awaited return to the America's Cup, the oldest sporting competition and most prestigious sailing race in the world.

In 2003, Alinghi was the first European team to win the America's Cup – a sensation! In October 2024 the Swiss team will be competing in the 37th America's Cup in Barcelona after a long break.

We stand for cutting-edge technology and top performance – just like Alinghi Red Bull Racing. Our fast e-bikes are being used in Barcelona for training purposes and as an efficient mobility solution.

More on the
Alinghi Red Bull Racing
special models.

«The Stromer is really fast, and I like fast.»

Nils Theuninck, Alinghi Red Bull Racing Team

**New day,
new ride.**

#HereToChange

— **ST7** —

Extend the Possible

The ST7 combines top technology and high-end components to create a Speed Pedelec truly in the premium class.

ST7 – Maximum range and power.

- **Most powerful rear-wheel motor** with Sport mode up to 45 km/h
- Range: Up to **260 km**
- First Speed Pedelec with the low-maintenance, **lightning-fast electronic shifting system** Pinion Smart.Shift
- **Low-maintenance belt drive** (Gates Carbon Belt Drive)
- **Fully integrated ABS** (front)
- **Fully integrated design**
- **High-end components** from the powerful 4-piston brakes from TRP and the headlights from Supernova to the large-volume tires from Pirelli

With all options

A woman with curly hair, wearing a grey zip-up hoodie and dark leggings, stands on the left side of the frame. She is holding a blue bicycle helmet in her right hand. To her right is a white bicycle with black accents. The background consists of dark horizontal blinds, creating a striped pattern. The lighting is dramatic, with strong highlights and deep shadows. On the far left, a sliver of a modern building with large windows is visible.

**Sorry, I'm early.
I missed the traffic jam.**

#HereToChange

Experience riding joy for yourself.

The incomparable Stromer feeling is hard to describe. Your best bet is to experience it for yourself – by taking a test ride!

With a Stromer specialist dealer

The Stromer dealer near you will give you the best advice and loan you the appropriate model. You should ideally test your Stromer for a day or two on your commute.

Contact your dealer
for a test ride.

+STROMER-

On Tour

We are traveling throughout Europe with our test bikes and will be stopping near you. Enjoy a consultation and test our current models free of charge!

To the event calendar.

Financing.

If you are interested in a leasing, subscription or financing model as a private customer, contact the Stromer dealer near you directly. Many of our partners offer individual financing solutions.

Many countries also have funding programs or offer bonuses for sustainable mobility solutions.

Learn more about the options
in your country.

Fleet solutions.

Everyone is talking about sustainability – and it can also be found in many corporate mission statements and traffic concepts. Time to take it to the streets! Put your money on a Stromer fleet for the mobility of your employees.

For companies

The e-bike is the new company car – with these benefits:

- No stressful traffic jams before work
- No need to search and pay for a parking space
- Up to 8 times less (parking) space required than a fleet of cars
- More sustainability and climate protection
- More exercise in the fresh air
- Unique riding fun for your employees
- More satisfaction and motivation

For cities and communities

A Stromer fleet is ideally suited for cities' and communities' implementation of sustainable traffic concepts or as a sharing business.

Ask about fleet solutions for
companies or cities & communities.

**Let the good
times roll.**

Safe on the road: Stromer Smart Helmet Aura.

The lightweight 370g Smart Helmet Aura is particularly air-permeable thanks to its 16 ventilation openings. Coupled with Bluetooth, the Stromer brake lights are transmitted to the helmet for extra visibility. The integrated MIPS system offers reliable impact protection. Compatible with magnetic visor (sold separately).

Scan for prices and additional info.

Online configurator. Insurance.

With the Stromer online configurator you can easily put together your Stromer yourself. It shows you all the available options such as frame colors, frame sizes and equipment options.

In **Switzerland**, the **Netherlands** and **Belgium** and **Luxembourg**, breakdown and theft insurance are included in the purchase price. In many other countries, you can obtain suitable protection through your dealer. Before buying a bike, check whether theft is adequately covered by your existing insurance and ask your dealer about a suitable solution, if necessary.

Scan and configure.

More on the topic of insurance.

Quality pledge – Stromer is synonymous with supreme quality, durability and functionality. We provide a two-year warranty on all models. On frames: 10 years. On batteries: 75 % of capacity within 2 years. For all bikes (from 2018 model year) we offer an extended warranty that can be extended by a further year on a rolling basis.
