We have definite ideas about what a tire must deliver, which is why we only trust specialists or premium tire manufacturers like Pirelli with their development. All tires are compatible with all current models.

## Tires

**Product**
- Pirelli Angel ST Sport
- Pirelli Angel ST Urban
- Stromer E-Gridlock by Vee Tire
- Stromer Custom TA/54 by Vee Tire
- Pirelli Angel WT Urban

**Brief description**
- The Pirelli Angel ST Sport was developed especially for the ST5 and tailored completely to the dynamic riding style. Whether in the city or on curvy country roads, Pirelli’s entire expertise comes to play in the Angel ST Sport.
- The Pirelli Angel ST Urban was developed especially for the ST3 and therefore for driving in the city and for the daily commute. It rolls softly, is extremely reliable and ensures maximum grip on every surface and in every weather.
- The E-Gridlock was specially developed for Stromer’s complete Speed Pedelec range. The reinforced tire construction stays on track, even at high speeds and under high loads. The tread pattern was inspired by the motorcycle sector and provides the grip.
- We developed these tires especially for the ST1. Thanks to its special tire compound, it promises plenty of grip on wet and dry surfaces and has outstanding puncture protection. ECE 75 approval for Speed Pedelecs.
- The Angel WT Urban was developed specifically for the winter season. Special rubber formulation and tread, designed for thin coatings of snow and cold asphalt with a slick surface. Has outstanding puncture protection.
