+STROMER- #HereToChange
Longing for Monday mornings.

#HereToChange

Our mobility requires change, and we can all do our part. Trade in traffic or the stress of public transport for a healthier mode of travel and fresh morning air. Look forward to your commute every day. Experience the indescribable feeling of freedom and autonomy on two wheels. Enjoy every curve and every moment. At Stromer our daily task is promoting and advancing mobility while offering you an incomparable riding experience.

We are #HereToChange.
The nimble e-bike for every day.

With a talent for innovation and engineering, we strive for the highest precision and quality. We develop Speed Pedelecs (e-bikes up to 28 mph) for people who want to get things done and who also enjoy being on the go themselves.

High CO₂ emissions and stress in commuter traffic? Not with a Stromer. In 2022 over 110,000 people around the world rode more than 61.5 million miles on a Stromer. Compared to car drivers, they thereby saved 18,847 tons of CO₂.

Join the Stromer community and experience pure riding joy!

• Incomparable drive – powerful, silent and dynamic
• In an exhilarating 2.9 seconds from 0 to 28 mph
• Ideal for daily commutes up to 22 miles or even more (range up to 150 miles)
• Travel efficiently, without breaking a sweat – even for less athletic riders
• Uncompromising, comprehensive safety concept – from visibility and components to connectivity
• Better performance at your job
• More relaxation after clocking out

"My Stromer makes me feel free like nothing else, a feeling I never want to lose again"
What makes a Stromer so special.

**#Design**
We give shape to riding fun. Invisible cable routing, barely visible motor, fully integrated battery and on-board computer: The award winning, integrated design perfectly combines aesthetics with technology.

**#Connectivity**
Over-the-air updates, free app, triple anti-theft protection with GPS localization, Smartlock, crash detection, individual motor settings and much more. Thanks to the full connectivity via OMNI connect, you have the best connection to your Stromer.

**#Power**
Our powerful rear-wheel motors with up to 750 W | 52 Nm help to silently and dynamically accelerate up to 28 mph. And the best thing? They act directly on the hub. This means less wear, and instead more thrust, safety and riding fun.

**#Range**
Stromer batteries have true endurance: Our strongest battery can make it up to 160 miles, or even further thanks to recuperation of the braking energy (regenerative braking).

**#Safety**
Strong brake system — optionally with ABS — and daytime running light, tires with the highest grip, best balance: Your safety is guaranteed by top-quality technologies and components.
More riding pleasure, safely.

Our Speed Pedelecs are specially designed for riding on the road and in urban traffic – terrain on which optimal balance, braking power, grip and good vision/visibility are vital. For this reason, all Stromers have:

• Powerful brakes (some with ABS)
• Daytime running light and super-bright LED headlights
• Special frame geometry with a low center of gravity for ideal roadholding
• Tires developed specifically for us (by Pirelli, among others) for maximum traction and grip
• «Crash Alert»: Crash detection and an automatic text message to an emergency contact (only available in Europe)
• Connectivity to the Stromer Smart Helmet with additional brake light

Fully integrated anti-lock braking system.

We introduced the world’s first Speed Pedelec with a fully integrated ABS from Blubrake onto the market in 2022 with the ST5. The new ST7 and (as an option) the ST3 Pinion are also equipped with this electronically controlled brake technology. It ensures that the front wheel does not lock up and the e-bike does not flip, even if the brakes are fully applied. The powerful 4-piston brake from TRP is perfectly tuned to the bike. This means that you are safely on the go even with challenging road conditions and traffic situations.

Our ABS was tested and graded as good by the Swiss Council for Accident Prevention (BFU).
Smart connectivity – with Stromer OMNI connect.

The cloud-based platform OMNI connect seamlessly connects you to your e-bike – via the Stromer display and free OMNI app. This allows you to easily config and locate your Stromer as well as call up vital data. The OMNI functions include:

**Triple anti-theft protection** when locked:
1. Electronic motor locking: Your Stromer cannot be ridden without unlocking it via the app or by entering the PIN on the display.
2. Warning message: As soon as your Stromer is moved while in locked mode, you receive a text message or an email and the bike’s flashers and horn are activated.
3. GPS localization

**Smartlock:** Automatic locking and unlocking via Bluetooth.

**Keyless:** Keyless battery ejection at the push of a button.

**Individual motor settings:** Adapt the behavior of the motor, e.g. select assistance mode, regulate pedal and brake sensor.

**Remote services and updates:** Service booklet (incl. service reminder), calling up information on the state of the Stromer (e.g. battery charge level, battery temperature, motor temperature) – also via remote maintenance by your specialist dealer; software updates over the air.

**Statistics:** Calling up performance data, e.g. mileage, average speed or active days.

**Crash Alert:** Crash detection and an automatic text message to an emergency contact (only available in Europe).

The models ST2, ST3, ST5 and ST7 have full connectivity via cellular network and Bluetooth thanks to the free integrated SIM card – meaning that all functions are enabled.

The model ST1 has basic connectivity via Bluetooth. The SIM card can be enabled as an option, and with it full connectivity with all functions.
Empowering Game Changers.

As the official e-bike partner of Alinghi Red Bull Racing, we support the Swiss sailing team with our Speed Pedelecs.

This year we are dedicating two special models to the team’s long-awaited return to the America’s Cup, the oldest sporting competition and most prestigious sailing race in the world.

In 2003, Alinghi was the first European team to win the America’s Cup – a sensation! In October 2024 the Swiss team will be competing in the 37th America’s Cup in Barcelona after a long break.

We stand for cutting-edge technology and top performance – just like Alinghi Red Bull Racing. Our fast e-bikes are being used in Barcelona for training purposes and as an efficient mobility solution.

“The Stromer is really fast, and I like fast.”
Nils Theuninck, Alinghi Red Bull Racing Team
New day, new ride.

#HereToChange
The ST7 combines top technology and high-end components to create a Speed Pedelec truly in the premium class.
ST7 – Maximum range and power.

- **Most powerful rear-wheel motor** with Sport mode up to 28 mph
- **Range:** Up to 160 miles
- **First Speed Pedelec** with the low-maintenance, lighting-fast electronic shifting system Pinion Smart.Shift
- **Low-maintenance belt drive** (Gates Carbon Belt Drive)
- **Fully integrated ABS** (front)
- **Fully integrated design**
- **High-end components** from the powerful 4-piston brakes from TRP and the headlights from Supernova to the large-volume tires from Pirelli

**Motor**
SYNO Sport II | 750 W | 52 Nm | -28 mph

**Battery/max. range**
BQ1440 | 48 V | 1440 Wh | -160 miles

**Sport frame**
M ≤178 cm, L 175 - 188 cm, XL >185 cm

**Frame colors**
Dark Platinum

With all options
The ST5 ensures the highest performance and riding dynamics. It is noted for its maximum integrated design and exclusive high-end components.
ST5 – The executive among e-bikes.

- **Very powerful rear-wheel motor** with Sport mode up to 28 mph
- **Range:** Up to **110 miles**
- **Fully integrated ABS** (front)
- **Fully integrated design** – multi-award-winning
- **High-end components** from the powerful 4-piston brakes from TRP and the headlights from Supernova to the large-volume tires from Pirelli

**Motor**
SYNO Sport | 750 W | 48 Nm | -28 mph

**Battery/max. range**
BQ983 | 48 V | 983 Wh | -110 miles

**Sport frame**
M < 178 cm, L 175 - 188 cm, XL > 185 cm

**Frame colors**
Granite Grey

With all options

The ST3 is our performance bike – perfect for daily riding and equipped with a number of smart extras. Available with chain or belt drive and optionally with ABS.
ST3 Pinion – Purist efficiency straight out of the future.

- **Powerful rear-wheel motor** up to 28 mph
- **Range:** Up to **90 miles** (can be optionally upgraded to 110 miles)
- **Durable 9-speed gearbox** from Pinion
- **Low-maintenance belt drive** (Gates Carbon Belt Drive)
- Optional: **ABS** (front)
- **Customizable, comfortable riding position** (two stems available as factory options)
- **Integrated,** award winning design

Motor: SYNQ Drive II | 720 W | 44 Nm | -28 mph
Battery / max. range: BQ814 | 48 V | 814 Wh | -90 miles
Sport frame: M < 178 cm, L 175 - 188 cm, XL > 185 cm
Comfort frame: M < 178 cm (only Cool White)
Frame colors: □ Deep Black □ Cool White

Sorry, I’m early.
I missed the traffic jam.

#HereToChange
Experience riding joy for yourself.

The incomparable Stromer feeling is hard to describe. Your best bet is to experience it for yourself – by taking a test ride!

With a Stromer specialist dealer
The Stromer dealer near you will give you the best advice and loan you the appropriate model. You should ideally test your Stromer for a day or two on your commute.

Contact your dealer for a test ride.

We are traveling throughout Europe with our test bikes and will be stopping near you. Enjoy a consultation and test our current models free of charge!
Financing.

If you are interested in a leasing, subscription or financing model as a private customer, contact the Stromer dealer near you directly. Many of our partners offer individual financing solutions. Many countries also have funding programs or offer bonuses for sustainable mobility solutions.

Fleet solutions.

Everyone is talking about sustainability – and it can also be found in many corporate mission statements and traffic concepts. Time to take it to the streets! Put your money on a Stromer fleet for the mobility of your employees.

For companies
The e-bike is the new company car – with these benefits:
- No stressful traffic jams before work
- No need to search and pay for a parking space
- Up to 8 times less (parking) space required than a fleet of cars
- More sustainability and climate protection
- More exercise in the fresh air
- Unique riding fun for your employees
- More satisfaction and motivation

For cities and communities
A Stromer fleet is ideally suited for cities’ and communities’ implementation of sustainable traffic concepts or as a sharing business.

Learn more about the options in your country.

Ask about fleet solutions for companies or cities & communities.
Let the good times roll.

*Combination of handlebar, stem and fork may lead to non-compliance with the maximum vehicle height. Adaptation of the cable lengths (shifters/brakes) may be necessary.

Note country-specific regulations.

Unsure which model is right for you? Use the Bikefinder to figure it out!
Online configurator. Insurance.

With the Stromer online configurator you can easily put together your Stromer yourself. It shows you all the available options such as frame colors, frame sizes and equipment options.

In Switzerland, the Netherlands and Belgium and Luxembourg, breakdown and theft insurance are included in the purchase price. In many other countries, you can obtain suitable protection through your dealer. Before buying a bike, check whether theft is adequately covered by your existing insurance and ask your dealer about a suitable solution, if necessary.

Global innovation: Stromer Smart Helmet.

Make your ride even safer with the Stromer Smart Helmet: It not only provides optimal protection for your head, it also increases your visibility by transmitting the brake light to the helmet (via OMNI connect).

Quality pledge – Stromer is synonymous with supreme quality, durability and functionality. We provide a two-year warranty on all models. On frames: 10 years. On batteries: 75% of capacity within 2 years. For all bikes (from 2018 model year) we offer an extended warranty that can be extended by a further year on a rolling basis.
